

SECURITY & CCTV SOLUTIONS

SECURITY & CCTV SOLUTIONS

Protect your premises and keep your site secure all year round with our CCTV and security solutions.

Our comprehensive approach provides real-time monitoring, deters potential threats, and tightly regulates site access for peace of mind. No matter the size or scale of your site. Benefit from quick setup and expert support, ensuring hassle-free installation and ongoing assistance throughout the hire period.

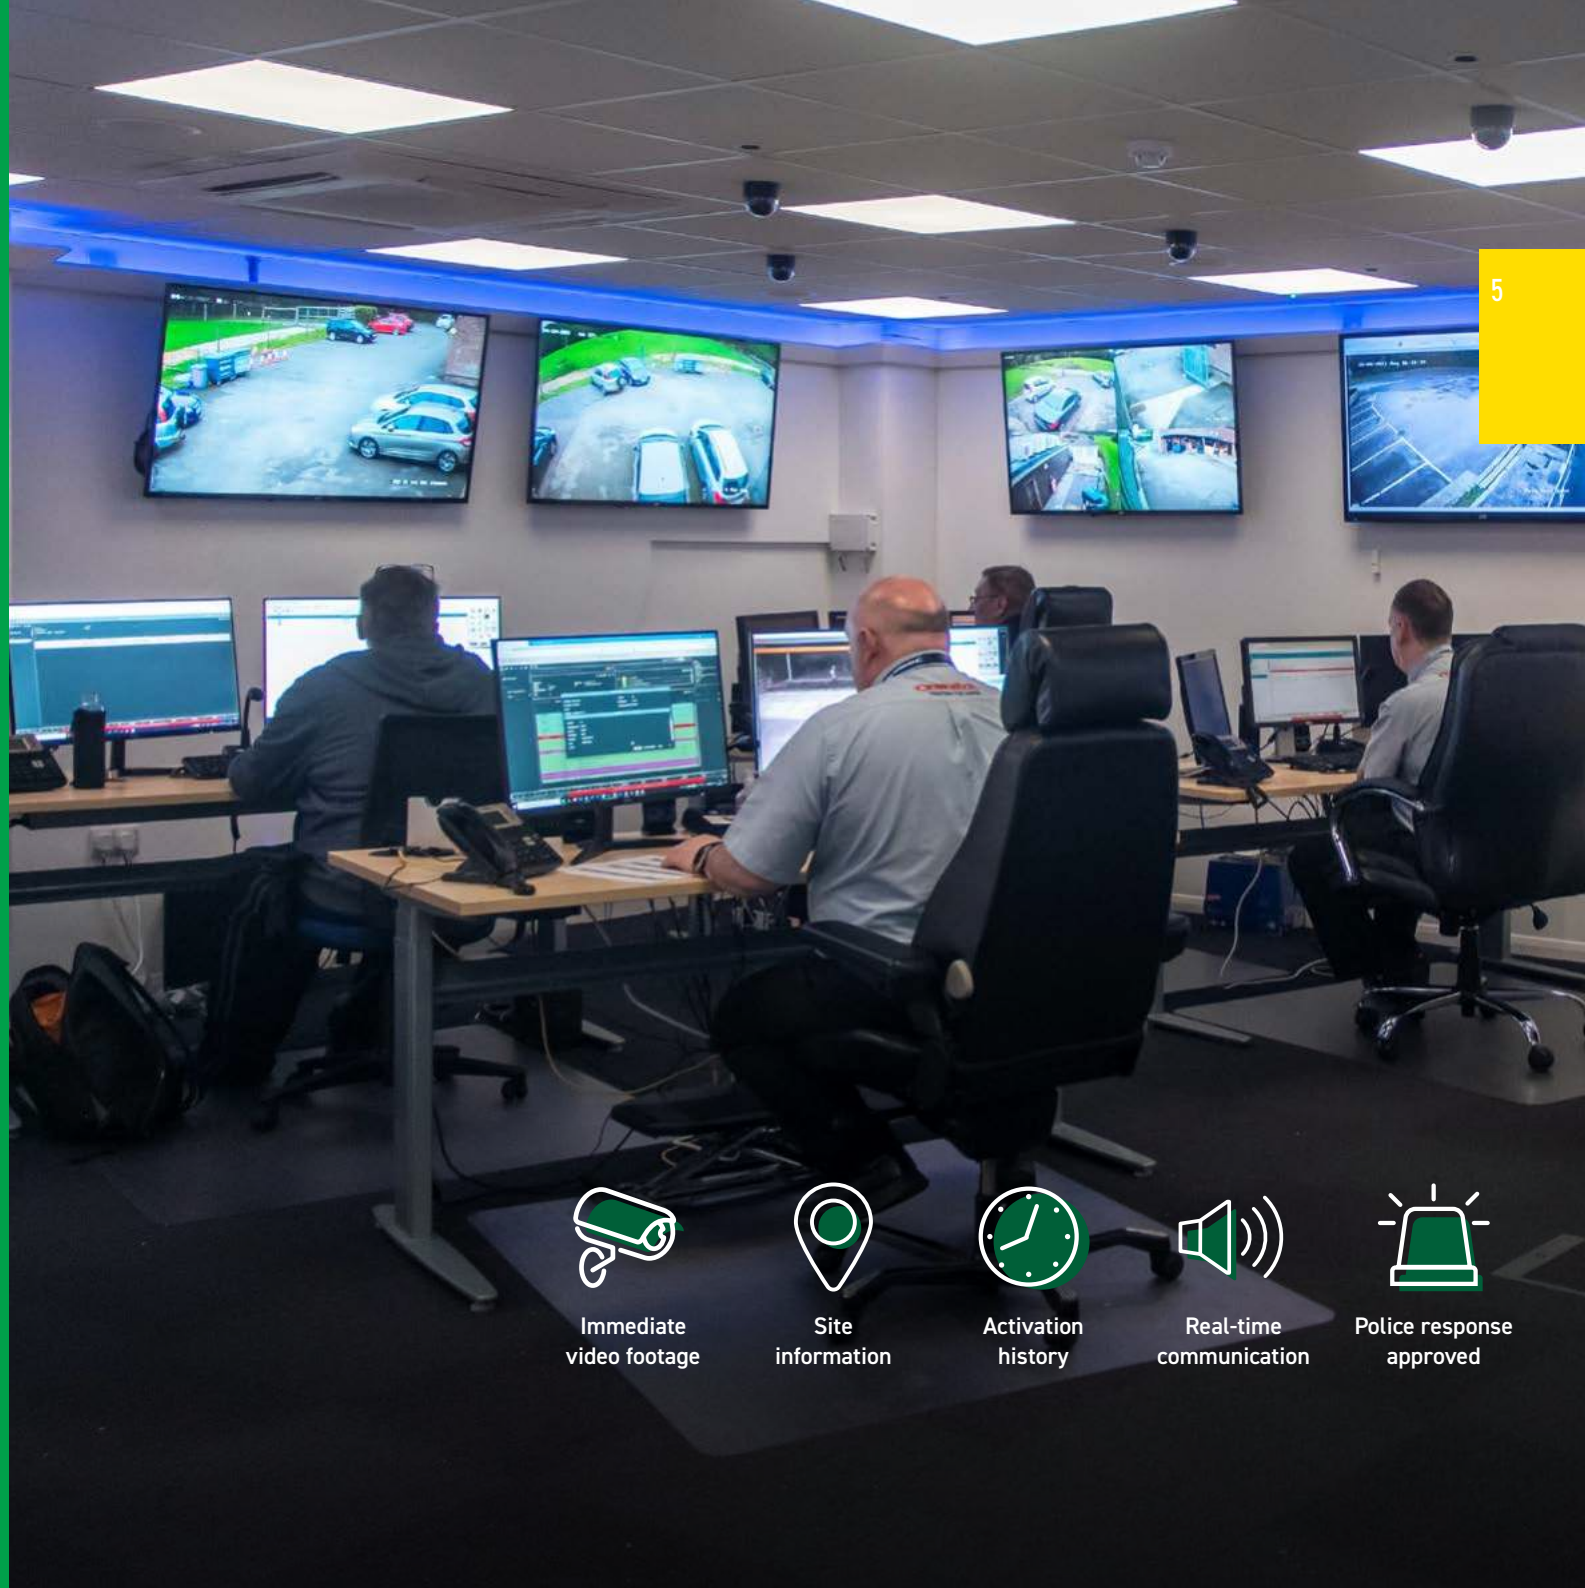

THE CONTROL ROOM

(BS5979 Cat2)

Our CCTV monitoring services are offered in collaboration with Onwatch (UK) Ltd, experts in delivering both permanent and temporary electronic security solutions to customers across the UK. Cutting-edge technology allows us to provide immediate video footage of any intrusion, complete with site information and activation history. Additionally, our audio facility enables real-time communication with intruders and is approved for Police response.

OPTIONAL SECURITY SOLUTIONS

ANPR (Automatic Number Plate Recognition)

Intelligent Access Control and ANPR systems can give your premises an added level of security, whilst maintaining records of staff and visitor movements around your site.

Thermal Imaging Heat Scan

Thermal imaging cameras see even the slightest change in site temperature, providing immediate recognition of a potential fire threat. They take the thermal energy emitted from a heat source and convert it into an image that is immediately sent to ARC for review.

Facial Recognition & Time Attendance

Utilise the latest facial recognition software to integrate with an access control system offering time and attendance logging with links to payroll.

Remote Monitoring

Ability to personally monitor your premises remotely from any location, at any time.

CCTV TOWERS

Elevate your security and surveillance capabilities with our versatile CCTV Towers, available in both solar and mains-powered versions.

This comprehensive system can be quickly deployed, offers customisable features, and provides unparalleled flexibility to meet your unique requirements. Each tower when set up is over six metres high to give greater coverage of the area.

- **Rapid Deployment:** Swift and hassle-free setup for timely security implementation.
- **Analytic Monitored CCTV:** Choose from options such as ARC monitoring or self-monitoring to best suit your needs.
- **Live Audio Announcements:** Real-time audio feedback for enhanced security and communication.
- **Site Expansion:** Scalable to accommodate changing requirements.
- **Solar or Mains-Powered:** Choose the power source that aligns with your location and energy needs. Easily connect to 240V power for uninterrupted functionality or go completely wire-free with solar CCTV solutions.
- **24hr Recording:** Continuous recording ensures all crucial moments are captured.
- **Warning Siren:** Deters potential intruders and enhances security
- **Weekly Rental Charges:** Enjoy flexible rental options for added convenience.

SECURITY & CCTV

Perimeter Intrusion Detection System (PIDS)

This security solution comes with a 10-meter camera range, day and night vision, and a robust external speaker. Unlike traditional PIDS, our system features four independent cameras with built-in batteries, own transmission paths, efficient solar-powered operation, and analytics for electronic area blanking, providing advanced, uninterrupted perimeter monitoring. With two-way audio communication and elevated height, our PIDS set a new standard in comprehensive and cutting-edge perimeter protection.

- 10-meter camera range
- Day and night vision capabilities
- Robust external speaker for heightened security alerts
- Four independent cameras with built-in batteries and transmission paths
- Efficient solar-powered operation
- Analytics-driven electronic area blanking
- Uninterrupted perimeter monitoring
- Two-way audio communication
- Elevated height for extended coverage

Semi-Permanent Solutions

Benefit from comprehensive site CCTV coverage and 24-hour recording on a short- or long-term rental basis with our semi fixed solution. Each site is unique, and our bespoke design using either wired or wireless camera placement ensures optimal security for your specific needs.

BODY WORN CAMERAS

Hytera VM580D Body Worn Camera

Experience the power of the Hytera Body Worn Camera range revolutionary devices that goes beyond traditional security cameras. These advanced body-worn camera can stream live video, uploads high-resolution photos, and shares real-time GPS location information over LTE, 3G, and WLAN networks.

Unlike any other BWC these units have inbuilt nationwide push over cellular instant voice for communication between the BWC and various other devices.

- **Night Vision:** Captures clear images in low light conditions with infrared technology
- **Radio:** Functions as a two-way radio for voice communication over LTE or WLAN networks
- **Durable:** IP68 certified, dust-proof, water-resistant, and withstands drops of up to 2 meters
- **Video Recording:** Records smooth and stable full HD video at 30 fps
- **LTE Live Video Streaming:** Streams live video over LTE networks for real-time situational awareness
- **Data:** unbreakable AES256 encryption
- **Long-lasting Battery:** up to 8 hours on a single charge

Hytera VM780 Body Worn Camera

This LTE-enabled body worn camera that allows you to capture everything that happens during an event and then share live videos, photos, and audio recordings with the command centre for improved situational awareness.

- **Camera:** optimal view and flexible wearing
- Starlight Night Vision in extreme low light environments
- **Long-lasting Battery:** up to 11 hours on a single charge
- **Data:** unbreakable AES256 encryption
- Stabilising for anti-shake camera performance

Hytera GC550 Body Worn Camera

This mini body camera with 2K HD wide-angled capabilities excels in capturing and securely storing high-quality videos, audio, and images. Weighing just 115g, it's the smallest and lightest Hytera Bodycam. Its user-friendly design allows for effortless wear, by attaching the 360 swivel clip to the user's front pocket.

- **Powerhouse:** Smaller than a standard business card, provides frontline staff with an incredibly light and easy-to-wear device.
- **Recording:** captures every detail with a wide-angled lens and crisp, clear videos.
- **Power for extra-long shifts:** smart low-power consumption technology and a large capacity Lithium Battery. An additional 5 minutes of back-up power allows for seamless battery replacement.
- **Slide-to-Record:** users can easily identify whether the camera is on or off. The auto-trigger recording function ensures critical moments are never missed.
- **Durability:** with a robust drop resistance of 1.5m, the GC550 is built to withstand harsh environments.
- **Security Airbag:** in case of sudden drops or impact, this feature ensures recorded videos are automatically saved.

Whatever, whenever, wherever.
