**SAFETY &  
COMMUNICATIONS**

# WE SPECIALISE IN THE HIRE AND SALE OF SPECIALIST SAFETY, CONFINED SPACE AND COMMUNICATIONS EQUIPMENT.

Led by some of the industry's most knowledgeable and experienced specialists, we also service and repair equipment and deliver a wide range of customer safety training courses.

In addition we also offer a wide range of specialist services such as Face Fit Testing, on-site communications support and Safety and Rescue Teams.

# CONFINED SPACE EQUIPMENT

These deaths occur in a range of industries and environments, from those involving complex plant to simple storage vessels. The people who lose their lives are those working in the confined space and those who try to rescue them without proper training and equipment.

## What is a confined space?

It can be a space of an enclosed nature where there is a risk of death or injury from hazardous substances or dangerous conditions (eg lack of oxygen). Some confined spaces are easy to identify, eg storage tanks, silos, drains and sewers. Others can be less obvious, but are equally dangerous, for example, open-topped chambers, combustion chambers, ductwork and even unventilated or poorly ventilated rooms.

We offer complete solutions for confined space working and rescue. From entry and egress systems such as Davits, tripods and gantries through to Breathing Air system and Gas Detection.

More importantly we offer support and guidance in the selection of equipment and we can also provide complete and accredited training.

▲ Confined spaces can be deadly - a number of people are killed or seriously injured in confined spaces each year in the UK. ▲

# GAS DETECTION

7

## Staying Safe in all Environments

Whether you are working in utilities, construction, emergency services or in an industrial environment it is essential that you are aware of exposure to toxic or combustible gases, or a lack of oxygen. Our complete range of gas detectors are essential for your safety and can detect, measure, monitor and react to gases and the changes in their levels around you.

We have a range of single and multi-gas portable devices as well as area gas detectors, all of which can reliably detect a wide range of gases.

We offer the very latest technology from the worlds leading manufacturers and can support you through specification to delivery – and beyond with service and calibration.

# BREATHING AIR

We offer a complete range of Breathing Air Solutions. Emergency Escape Breathing Apparatus that allows safe, effective and uncomplicated exit from hazardous environments. Self-contained Breathing Apparatus (SCBA) kits that supply wearers with breathable air from a compressed air vessel – widely used in emergency services.

Sunbelt Safety and Communications also offer a range of long duration breathing air solutions, including trolley systems and mobile breathing air trailers and compressors that supply air through a pneumatic system connecting the user with hoses.

It is essential to select the correct equipment for the task in hand and we can offer the guidance and on site support necessary for all applications

# CUSTOMER SAFETY TRAINING

One of the hire industry's leading customer training providers, offering an extensive range of Health and Safety, bespoke, product-related and accredited training programmes to help our customers improve competence, reduce risks and comply with ever-changing legislative demands.

## Our range of course include:

- City & Guilds Confined Space Training
- Cable Avoidance
- Site Safety Awareness
- And much more...

# RADIO COMMUNICATIONS

We have a range of communication equipment to meet specific customer requirements, all from leading manufacturers such as Hytra, Motorola and DBD. Our team of experts can advise the most suitable communication system either by phone or site visit.

- ATEX Radios
  - Communications Accessories
  - Digital Radios
  - Radio Communication Surveys
  - Standard Radios
- and much more

# FACE FIT TESTING

Where respiratory protective equipment (RPE) is used as a control measure under health and safety legislation, it is vital that the selected RPE is both adequate and suitable.

To ensure that the selected RPE has the potential to provide adequate protection for individual wearers, the Approved Codes of Practice (ACOPs) supporting the Control of Substances Hazardous to Health Regulations (COSHH), the Control of Lead at Work Regulations, the Control of Asbestos Regulations, the Confined Spaces Regulations and the Ionising Radiations Regulations stipulate that tight-fitting RPE should be fit tested as part of the selection process.

## What do we offer?

- FIT2FIT accredited Quantitative and Qualitative Face Fit Testing
- Qualitative and Quantitative Train the Tester courses
- RPE User's Training
- RPE Maintenance and servicing
- RPE Supply
- Powered Respirators
- Qualitative and Quantitative Test kits and solutions

# EQUIPMENT SALES

If it proves more economical for you to purchase equipment outright rather than hiring it, we sell a full range of safety, confined space and radio communications equipment. Our employees are manufacturer trained with a wealth of experience in this specialist field. They'll provide you with impartial advice about the most suitable products for the job in hand. Equipment can be purchased from one of our Safety & Communications depots or over the telephone.

# REPAIR AND SERVICING

Our depots have dedicated workshops and all rental equipment is fully maintained and serviced at the termination of each hire. We have a highly experienced team of qualified engineers, backed up with support from key manufacturers.

# TECHNICAL SUPPORT

Our equipment specialists are experienced in dealing with everyone from novice's right through to certified technical experts. We're here to guide you through projects from the initial point of contact, right through to completion.

# PROVIDING RENTAL PRODUCTS AND MANAGED SOLUTIONS INTO EVERY MARKET AND SECTOR

**PLANT & TOOLS**  
Over 200,000 items of equipment to choose from

**INDUSTRIAL**  
On your site to meet the demands where every second counts

**PLANT ATTACHMENTS**  
The sole UK distributor for several of the world's leading attachment manufacturers

**UTILITIES**  
The UK's largest specialist Utility hire company

**POWERED ACCESS**
