# MEETING THE DEMANDS OF A FAST-MOVING SECTOR WHERE EVERY SECOND COUNTS

Our dedicated industrial teams are located on-site with many of our customers at petrochemical, manufacturing, oil and gas facilities across the country.

HEWDEN INDUSTRIAL

Hewden Industrial  
is now  
Sunbelt Rentals  
Industrial

# TIMING IS EVERYTHING AND EQUIPMENT HAS TO BE UP AND RUNNING IMMEDIATELY TO GET THE JOB DONE.

Within Sunbelt Rentals Industrial Division we have many years' experience of working on COMAH sites within the UK to support the client's needs from a fully turnkey on site solution to support for specialist hired equipment and services

COMAH stands for The Control of Major Accident Hazards, helping businesses to take all the necessary measures to prevent major accidents with hazardous substances. It also limits the ramifications of any large scale accidents which do manifest, through enforcing regulations on hazardous substances to protect people and the environment.

COMAH is enforced in Great Britain by COMAH Competent Authority (CA) which is formed from five public bodies all working together in partnership.

These bodies are:

- The Environment Agency
- The Scottish Environment Protection Agency
- The Health & Safety Executive
- The Office for Nuclear Regulation
- Natural Resources Wales

# ADVANTAGES OF AN ON-SITE RENTAL FACILITY

- Having the right equipment, in the right place, at the right time is critical for contractors. Having an on-site rental and storage compound ensures a rapid response
- Immediate access to a vast range of rental equipment
- Deliveries to site can be dramatically reduced due to the on-site stockholding of equipment
- Enhanced security of plant and equipment
- The on-site facility is purpose-built for the specific project. Training facilities can also be incorporated to enhance workforce safety and competence
- Reduction in traffic flow to and from the site, creating a safer working environment
- Improved green credentials and a significant reduction in carbon dioxide emissions

## SPECIALIST ATEX LIGHTING

We offer a range of ATEX certified lighting solutions such as explosion-proof lighting and slam lights designed for use in hazardous areas. Our lighting products provide powerful illumination in extreme environments such as inside tanks and vessels.

## WELDING EQUIPMENT

All of our industrial sites and depots offer a wide range of welding equipment, including petrol and diesel engine driven welders for both MIG and TIG welding. We also offer a range of welding accessories including cable, flowmeters, manifolds, masks, regulators, screens, torches and trolleys.

## POWER AND AIR SOLUTIONS

Our range of generators and compressors all come fitted with chawyn valves and spark arrestors as standard, and are suitable for all refinery and power sector specifications.

### INDUSTRIAL RELATED SPECIALIST TOOLING

We've got a huge range of tools for shutdown, maintenance or other industrial projects. Product lines include breakers, chipping hammers, grinders, saws, scabblers and more.

### GAS DETECTION EQUIPMENT

The detection of hazardous gases is absolutely critical for the safety and efficiency of industrial facilities. Our gas detection devices feature easy to read displays to allow users to detect gas, protect personnel, analyse environments and mitigate risk-related delays.

### INDUSTRIAL SAFETY CRITICAL EQUIPMENT

Our range includes safety and communications equipment such as 'fresh air' breathing apparatus for use in confined or heavily contaminated areas, cable and pipe locators, confined space access and height safety equipment.

### COMMUNICATIONS EQUIPMENT

Our communications equipment includes ATEX radios with Bluetooth, Wi-Fi and indoor and outdoor tracking capabilities. Plus digital radios which allow users to directly respond to emergent situations.

### PIPEWORK AND PIPE INSTALLATION EQUIPMENT

We offer a huge range of pipework and pipe installation equipment to ensure correct pipe placement. Products include clamps, pipe rollers, pipe stands, steel pipe cutters, threaders and tube benders.

### TORQUE EQUIPMENT

Our range includes manual and pneumatic torque equipment, including torque wrenches for use in areas with restricted headroom and compact torque wrench pumps which are easy to transport between sites.

### SHOT BLASTING EQUIPMENT

We supply a full range of equipment associated with shot blasting, including blast pots, compressor air lines, breathing air lines, blast hoses and nozzles to suit all blasting.

### WATER PUMPS

We have a wide range of water pumps including diesel, petrol and electric models to pump water and solid matter. Water levels can be safely reduced with our submersible pumps.

### POWERED ACCESS EQUIPMENT

We're one of the UK's market leaders in the rental of powered access equipment. Our range of equipment for safe work at height includes booms, scissor lifts, tracked access, vertical masts, low level access equipment and more.

### PLANT EQUIPMENT

We've got the largest fleet of plant hire equipment in the country. From dumpers to excavators, telehandlers to compressors, major investment has been made in the most innovative, sustainable and fuel-efficient equipment currently available.

### SPECIALISTS TOOLING

We supply a variety of specialist tools which include pipe bevelling, battery torque guns, Rad and J guns.

### FUEL STATION

We offer a temporary, on-site fuel station which is ideal for use during industrial shutdown and maintenance projects. The fuel station is a self-bunded standalone fuel tank equipped with advanced telemetry and a fuel management system. It allows customers to control the fuel used on-site and remotely track fuel levels. With automated email and text alerts, fuel can be ordered in advance of the tank running empty. The fuel station also reduces safety risks, transport costs and CO2 emissions by having fewer tanker deliveries.

### MOBILE PLANT ASSURANCE CHECKS AND TAGGING

Operating diesel engines in hazardous environments is a serious safety risk. A release of flammable gas or hydrocarbon vapour can occur at any time and be drawn into the engine's air intake. Turning off the ignition will not shut off the engine because it is running on the external fuel source. The diesel engine will continue to accelerate rapidly and runaway. This situation can lead to dangerous mechanical failure with high potential to cause flashback explosion of the leaking hydrocarbons.

To ensure optimum safety, our on-site engineers can carry out mobile plant assurance checks on mobile diesel-driven plant. Successful inspections result in the issue of a mobile plant tag and plant must not be taken onto industrial sites or operated without a successful inspection.

Common reasons for failure include:

- Missing or incorrectly fitted chalywn valves and spark arrestors
- Equipment not to site standard
- Equipment not tested for use correctly and processing the valid paperwork
- Equipment not site compliant

Our skilled Industrial specialists can ensure all equipment goes onto the site work area to the required standard, specification and ready for use.

## TELEMATICS TECHNOLOGY - TRAK & CESAR

On large industrial sites, it can be a challenge keeping track of where your rental equipment is and how it's being used. Especially during busy shutdown programmes when there are typically high volumes of people and plant on-site.

Trak is an innovative GPS satellite tracking system and fleet management tool that allows you to have complete control over hired equipment. You can see online exactly where every piece of equipment is located and gather 5,000 critical pieces of information. The technology also allows you to locate equipment if it is stolen. As an additional back-up, much of our plant equipment is also registered with CESAR (The Construction and Agricultural Equipment Security and Registration Scheme). We are one of the few rental companies to protect our equipment with both a tracking system and CESAR registration.

- Telematics technology can be used to help drive efficiency and enable remote management
- Equipment can be immobilised from your mobile phone
- A 'virtual fence' can be created around equipment, so if it ever leaves that zone you are alerted by email or text message
- Aerial photography can be generated of the site where the equipment is located
- Trak can be used to report authorised and unauthorised vehicle movement, the ignition state, fuel levels, battery levels and much more
- Stolen plant equipment has very low recovery rates of less than 10% but this shoots up to 95% with Trak and CESAR

# TEKSERVE

When rental equipment is used in industrial environments, it's important that it's maintained to the highest standards, as it's often used in time sensitive and safety critical applications.

Tekserve is our online servicing, maintenance and breakdown reporting system. As a business, we use it to record and resolve all equipment servicing, maintenance and breakdowns. It automatically provides all maintenance and inspection notifications for our equipment. This ensures that servicing always takes place on schedule and ultimately leads to greater equipment reliability. Customers can use Tekserve for reporting breakdowns and receiving updates. It also provides timed and dated audit trails to allow customers to easily and accurately measure KPI's.

- Simple method of reporting breakdowns and receiving resolution notifications
- Enhanced response times for breakdown incidents
- Complete audit trail
- Helps create a paper free environment
- Compliance to health and safety regulations relating to the periodic maintenance of equipment
- Access to certification through the Sunbelt Rentals extranet system

# PROVIDING RENTAL PRODUCTS AND MANAGED SOLUTIONS INTO EVERY MARKET AND SECTOR

**PLANT & TOOLS**  
Over 200,000 items of equipment to choose from

**INDUSTRIAL**  
On your site to meet the demands where every second counts

**CLIMATE CONTROL**  
Economical and efficient temperature control and HVAC solutions, with a 24/7 emergency response service

**RAIL**  
We support the Network Rail and Transport for London infrastructure – keeping the railway moving 365 days a year

**PLANT ATTACHMENTS**  
The sole UK distributor for several of the world's leading attachment manufacturers

**UTILITIES**  
The UK's largest specialist Utility hire company

**ACCOMMODATION**  
24/7/365 call out facility covering 20,000 items on fleet

**HOISTS**  
We hold over 10km of mast sections, enough to scale London's Shard building over 32 times

**POWERED ACCESS**  
The combined height and reach of our equipment can transport you safely over 50,000 meters

**SAFETY & COMMUNICATIONS**  
The industry's most knowledgeable and experienced specialists in this field

**TRAKWAY**  
Award winning engineered access and ground protection solutions

**FORMWORK & FALSEWORK**  
We are the exclusive hire supplier of MEVA products in the UK

**LIFTING**  
Our solutions have been used on 7/10 of the tallest buildings in the UK

**SURVEY**  
The UK's industry-leading supplier of land survey and precision measurement technologies

**TRAFFIC MANAGEMENT**  
24/7 national coverage with operations covered by QEHSS accreditations

**TRAINING**  
We have a dedicated Health and Safety training operation to qualify our own people and our customer's people

**POWER**  
5000 rental units - Enough equipment to power a small city

**TEST & CALIBRATION**  
Europe's leading test equipment specialists since 1996

**BARRIERS & FENCING**  
Crowd control and perimeter security solutions

**LIGHTING**  
Our state-of-the-art tower lights will keep your worksites safe and secure

**01642 566119 Option 3**  
**ordersindustrial@sunbeltrentals.co.uk**
